

---

An unattended campfire starts one out of every four human-caused wildfires.

Before you light a campfire, consider these helpful tips:

- Clear vegetation away from fire ring. Keep kids from removing burning sticks and twigs from the fire.
- Keep plenty of water handy and have a shovel for throwing soil on the fire if it gets out of control.
- Drown campfires with water. Make sure all embers, sticks, and coals are covered with water. Stir thoroughly to ensure all organic material is wet.
- Feel with your hand to make sure all coals and embers are dead out!
